

Why do I need a system tune-up each year?

In one year, your heating and cooling units can run for as many as 3,000 hours. When you neglect them, you pay dearly—with the price measured in wasted fuel, shortened equipment life and inconvenient, expensive breakdowns. Even more important, a system that receives regular tune-ups is a safe system.

- ❖ **Fewer service problems.** Our precision tune-ups on your heating and air conditioning systems prevent problems, from small repairs to major breakdowns.
- ❖ **Save on heating and cooling bills.** You can save as much as **\$30 per month** on your summer electric bills and **up to 10%** on winter fuel bills.
- ❖ **Safety.** To prevent carbon monoxide poisoning caused by a faulty heating system, our tune-ups include safety and venting checks.
- ❖ **Keep warranties valid.** Most warranties for heating and air conditioning equipment exclude “repairs that occur due to lack of regular routine maintenance.” Our Priority Service Plan includes regular maintenance.

Introducing our Priority Service Plan

Nobody is happy when their heating or air conditioning system breaks down. What’s more, breakdowns usually happen at the worst time—when the weather is at its hottest or coldest. And if you’re having problems, you can bet your friends and neighbors are too. That means you might have to wait a long time for service.

We have a better idea for you. Sign up for a Priority Service Plan! For less than it costs to buy a cup of coffee a day, you can enjoy the best protection available today, for your home comfort equipment and for you and your family.

Receive up to \$500 in Loyalty Credits!

The Priority Service Plan is also an investment in the future. For every consecutive year you sign up for combined heating and air conditioning coverage, you earn Loyalty Credits, \$50 for the Gold Plan and \$50 for the Silver Plan, up to a total of \$500. You can use these credits toward the purchase of heating and cooling equipment. Here’s how much you can save:

high-efficiency heating and central air system	\$500
high-efficiency furnace or boiler	\$300
high-efficiency central air system	\$300
zoning system	\$100

You’ll feel the difference!

Don’t wait until you’re in trouble to make the right decision. Call us or return the enclosed card and then rest easy all year long!

The Prescription for Your Comfort

Our Priority Service Plan means peace of mind.

By choosing year-round protection with a Priority Service Plan for your heating and cooling systems, you'll enjoy these benefits.

- ❖ **“First-in-line” priority service, 24 hours a day.** Only Priority Service Plan customers get to cut in line ahead of nonmembers and receive service on weekends and holidays. Plus, the first and last service calls of the day are reserved exclusively for you. Also, if you alert us to a heating or cooling problem before noon, Monday through Friday, we'll be there the same day, with no additional charge.
- ❖ **Immediate savings of \$39.** With tune-ups included in our service plans, you save money right away—\$39 off the total cost of purchasing separate heating and cooling tune-ups. Regular tune-ups also save you money by cutting energy use, preventing repairs and extending equipment life.
- ❖ **Big savings.** Designed for newer systems, our Silver Plan starts with a 15% discount on *everything*, from the repair itself to the diagnostic fee—and there are no extra overtime charges for after-hours emergency service. If you have an older system, our Gold Plan is for you. It covers up to \$500 of your repair costs (on most parts) and all of the diagnostic fee during regular hours—that's a \$72 savings. Plus, with the Gold Plan there are no overtime charges for after-hours service, and emergency service is free.

Your savings add up.

Even small problems with your heating and cooling systems can take big bites out of your budget. With the protection of our Priority Service Plan, there's a lot less to worry about.

Typical repair savings with the Gold level of our Priority Service Plan:

❖ furnace blower motor	\$308
❖ furnace circuit board	\$434
❖ condenser fan motor	\$298
❖ condensate pump	\$275
❖ circulator pump	\$422

Service savings:

❖ diagnostic fee	\$72
❖ two tune-ups	\$178

A Priority Service Plan gives you less to worry about and lets you focus on the important things in life.

We guarantee your comfort.

Most heating and cooling companies look the same from the outside. The truth is, they're not. At Energy Savers, we have spent years perfecting the things that really make a difference to our customers.

- ❖ **Precision heating and cooling tune-ups.** When we tune up your system, we don't guess. For heating systems, we use special testing equipment to be sure the system is adjusted for maximum efficiency.
- ❖ **Always available.** You will always get a person, not a recording, no matter what time you call us.
- ❖ **Respect for your property.** We always clean our work area when we finish a job. To protect your property, we lay down drop cloths and wear booties.
- ❖ **Expert safety inspections.** We follow strict standards when testing for sources of dangerous levels of carbon monoxide in your home.
- ❖ **No subcontractors.** Other companies may send inexperienced subcontractors to your home to do service work. Not us. We only use our own skilled technicians, who receive ongoing training and have all the resources they need to solve even the most complicated problems.

- ❖ **New parts, fast repairs.** We only use new parts, not rebuilt ones. Our service trucks carry thousands of dollars' worth of replacement parts to ensure that we can fix most problems in one visit.
- ❖ **Two-year warranty.** We guarantee repairs for two full years. If the part we fixed breaks within two years, we repair or replace it and you pay nothing.
- ❖ **Accurate price quotes.** For new equipment installations, the price we quote you will be the exact price you'll pay when the job is complete.
- ❖ **100% satisfaction guarantee.** If your new system does not heat or cool your home as promised, we will remove it and return 100% of your money.
